

README

To run the web-application follow the following steps:

1. Install Spring Tools Suite (STS) from the Spring Framework Website.
2. Import the *csci401-project* folder into STS.
3. You should now see the directories of the project in the left-side column in STS.
4. Right click on the demo project, and Run As -> Spring Boot App
5. Once the app is running, visit localhost:8080/ on any browser to view the application.
6. Working page addresses are :-
 - i. localhost:8080/user
 - ii. localhost:8080/users/all
 - iii. localhost:8080/users/1/
 - iv. localhost:8080/users/2/
 - v. localhost:8080/projects/all
 - vi. localhost:8080/projects/1
 - vii. localhost:8080/projects/2
