<u>README</u>

Clone the Github repository at :-

https://github.com/joanhong/csci401-project

Once cloned, to run the web-application follow the following steps:

1. Install Spring Tools Suite (STS) from the Spring Framework Website.
2. Import the *csci401-project* folder into STS.
3. You should now see the directories of the project in the left-side column in STS.
4. Right click on the demo project, and Run As -> Spring Boot App
5. Once the app is running, visit localhost:8080/ on any browser to view the application.
6. Working page addresses are :-

    i. localhost:8080/user
    ii. localhost:8080/users/all
    iii. localhost:8080/users/1/
    iv. localhost:8080/users/2/
    v. localhost:8080/projects/all
    vi. localhost:8080/projects/all.json
    vii. localhost:8080/projects/1
    viii. localhost:8080/projects/2
    ix. localhost:8080/projects/1.json
    x. localhost:8080/projects/2.json
    xi. localhost:8080/users/1.json
    xii. localhost:8080/users/2.json
    xiii. localhost:8080/users/all.json
